Steve,

Can you provide the emails/addresses this report needs to go. I will ask David to add those EPA addresses so y'all can get the reports directly.

Patrick

Subject: RE: TPCN Sit rep 8.29.17 @ 1530

Current Sit Rep – decided that since there will be tons of reports coming in that I would condense report to current day situation and numbers for Texas Poison Center Network (TPCN) and we can look back on previous reports for how it all rolled out.

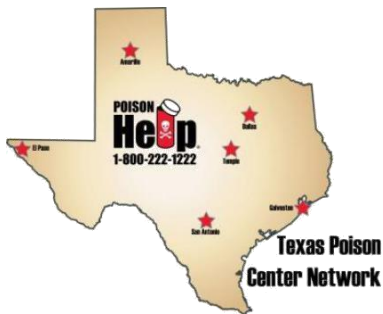

Health will provide their own sit rep and the poison centers will educate staff as we receive information.

Thank you all for your efforts during this disaster.

S. David Baker, PharmD, DABAT | Director | Central Texas Poison Center
| Office phone 254.724.7409 | cell phone 254.624.4450

Tuesday, August 30, 2017 1630 CST Hurricane Harvey Incident - Report 6

Reporting Period: 8/24/17 – 8/30/17 - 1630

Current Situation (8/30/17)

- TPCN is answering approximately 90 (or so) calls per day from the SETPC region which is down from an average of 130 calls per day for the year. Most calls continue to be due to routine poisoning exposures such as medication errors and accidents in homes.
- TPCN Specialists report having difficulties in referring patients from Harvey-affected areas with moderate to high risk exposures into healthcare facilities and have had to adjust their normal referral practices to the individual patient's circumstances.
- SETPCC (Galveston) – flood has subsided and travel is possible but cannot open poison center until building inspector approves occupancy.
- All Specialists in Poison Information of the Texas Poison Center Network have been instructed to continue to collect additional information on hurricane related exposures and to code cases as PUB Health EMERG and to use AAPCC emergency code on the case to help aid in epidemiological studies.

See previous situation reports for historical updates.

All other regional poison centers in Texas will remain open and will handle all calls routed to them to cover the center(s) that have to close

Central Texas Poison Center will continue to provide situation reports daily until further notice, on behalf of TPCN.

You can find more disaster recovery advice at TexasPrepares.org.

Residents with poison concerns may continue to access 24-hour bilingual medical advice by calling the **National Poison Center hotline at 1-800-222-1222**.

Calls received to date:

Calls received by the Texas Poison Center Network
in relation to Hurricane Harvey as of ~1630 on 8/30/2017*

Calls specifically documented as relating to Hurricane Harvey

Year	Month	Day	Exposure calls	Information calls	Total calls
2017	8	25	2	1	3
2017	8	26	1	1	2
2017	8	27	5	1	6
2017	8	28	16	6	22
2017	8	29	22	2	24
2017	8	30*	4	1	5
Total			50	12	62

Calls from Public Health Regions 6, 8, and 11
(Regions most affected by Hurricane Harvey)
